

*Innovative Software and Service Solutions
for the Calibration and Maintenance Community*

 Available Nationwide

xTrak[®] by usCalibration

Online Asset and Calibration Management System

100% Online

- No software to purchase, install or upgrade! No server needed! Usable immediately!

Superior Technology

- Created with ASP .NET 4.5 and HTML5 technology ensuring a fast and improved user experience; same technology used by the U.S Air Force, Allstate Insurance, and usatoday.com.
- Utilizes Microsoft's SQL server 2014, the same database management system used by NASDAQ, Chevron, and DaimlerChrysler.

Asset Management

- Track the entire life cycle of any asset including procurement, installation, maintenance, calibration, repairs, upgrades, validations, retirement, and more.

Scalability/Customization

- Multi-user capability, including users outside the company such as vendors and customers.

Document Management System

- Upload, store, retrieve, and/or print documents and certificates related to asset records, calibration records, and maintenance records.

Calibration Management

- Monitor, track, and update your calibration records online.
- Perform tasks such as recall schedule view, calibration interval review, tool reassignment, status change, spare tool management, service record creation, and calibration history review.

Quality Assurance

- Will help you comply with domestic and international quality standards, such as ISO 9001, ISO 17025, ANSI Z-540, AS 9100, and others.

Supply Chain Integration

- Collaborate with other departments or facilities to keep your system simple.
- Centralize control of work done by multiple vendors anywhere in the world.
